Marantz MM-7025 Stereo Power Amplifier - \$750 (watsonville)

image 1 of 3

Excellent condition power amplifier: look almost new and works perfectly.

It works great with your AVR to provide proper amplification for your main left/right speakers allowing the main amplifier channels on your AVR to be used for Atmos/etc.

it includes the Marantz trigger cable so that the amp is turned on when you turn on your AVR.

It has RCA and XLR inputs.
